Buffalo Lithia Springs Water Company Completes Fine Bottling Plant

We beg to announce the completion of a New and UP-TO-DATE plant for handling and bottling the well-known BUFFALO LITHIA SPRINGS WATER in its natural purity and without loss of its health-giving properties. This plant was planned, built and equipped under the direction and personal supervision of some of the ablest mineral water experts, chemists and bacteriologists of this country and nothing that science could suggest or money purchase has been left undone to make the plant an ideal one for bottling and handling a medicinal water according to the latest scientific teachings. Some of the precautions taken may seem extreme, but the aim has been to anticipate, rather than fall behind, the advanced teachings of the day along this line.

The spring from which these waters flow is chiscled out of solid rock, lined with white tiling, covered with plate glass and the whole surrounded with triple re-inforced cement walls laid in the natural rock. The water is taken from the spring by means of an air tight pump, silver lined and fitted with silver valves, and forced through lines of block tin pipe into glass-lined steel tanks. From these tanks the water is drawn through silver faucets into NEW bottles which have been chemically treated, washed and rinsed with the purest water under high pressure, and sterilized-all in the most thorough manner and with the latest devices and equipment. Even the air which enters the white-walled bottling room is taken from high above the building, filtered and driven out by powerful electric fans, rendering contamination by dust, or otherwise, an impossibility.

The Buffalo Lithia Springs Water retains its medicinal properties to a remarkable degree when bottled and for thirty-eight years past this water has been widely prescribed by the medical profession and no remedial agent has received a larger share of medical endorsation of a high order. Most of this endorsation was given to the use of the bottled water, comparatively few of these eminent physicians having used the water at the Springs.

Around this model plant and its output is thrown every known sanitary precaution and the whole is under the watchful eye of a skilled bacteriologist.

For sale by the general drug and mineral water trade. Booklet and medical endorsation to any address.
